SUMMARY

Fullstack Developer experienced in building multi-role web platforms with React and TypeScript, real-time GIS tracking, and IoT systems with PHP/MySQL backends. [\[Tambahkan 1 kalimat tentang pengalaman freelance/backend.\]](#) Computer Science student at UNIKOM (graduating Feb 2027), seeking a [\[Fullstack Developer\]](#) role.

WORK EXPERIENCE

Freelance Fullstack Developer

Jan 2026 – Present

[\[Nama proyek / jenis klien 1\]](#) — [\[status: live / final testing, rilis bulan/tahun\]](#)

- Built a [\[landing page / web app\]](#) with [\[frontend stack\]](#) and an admin dashboard for managing [\[konten / paket / data\]](#) for [\[jenis klien\]](#).
- Developed the backend with [\[Node.js / PHP\]](#) and [\[database\]](#), including [\[REST API, authentication, media upload\]](#).
- [\[Hasil: jumlah halaman/modul, integrasi, atau target rilis\]](#)

[\[Nama proyek / jenis klien 2\]](#) — [\[status\]](#)

- [\[Apa yang dibangun, dengan stack frontend\]](#)
- [\[Sisi backend & database\]](#)

Frontend Developer (Intern)

Jul 2026 – Present

PT Langgeng Sejahtera Kreasi Komputasi, Bandung — Angkot To School, smart city web platform for DISHUB Kota Bandung

- Engineered the multi-role web portal (DISHUB Kota Bandung, fleet operators, school admins) using React 19, TypeScript, and Vite, supporting 10+ transit modules.
- Integrated interactive GIS and real-time vehicle tracking with Leaflet.js and WebSockets: live fleet tracking, geofenced shelter/pick-up points, and dynamic map markers.
- Optimized data fetching and global state with TanStack Query and Zustand, implementing server-side pagination, real-time cache invalidation, and synchronized notifications.
- Built type-safe form workflows with React Hook Form and Zod, handling two-step API transactions, debounced autocomplete search, and strict client-side validation.
- [\[Tambahkan hasil terukur jika ada, misalnya jumlah pengguna/peran/kendaraan\]](#)

PROJECTS

Threadability — Hoax Detection Chrome Extension for Meta Threads (Thesis)

[\[link repo/demo\]](#)

React, TypeScript, Vite, Chrome Extension (Manifest V3)

- Built a Manifest V3 Chrome extension that identifies text-based hoax posts on Meta Threads via custom context-menu triggers and DOM extraction.
- Implemented real-time verification badges and tooltips with confidence scores and fact-check references, backed by a background service worker and a local analytics dashboard.

Smart Parking IoT System (Internship Project)

github.com/ranggalabs/smart-parking-iot-esp32

ESP32, HC-SR04, PHP, MySQL, jQuery AJAX

- Built an IoT parking slot monitor using an ESP32 and HC-SR04 ultrasonic sensors to detect vehicle occupancy and send data over WiFi via HTTP POST.
- Developed a real-time dashboard with PHP, MySQL, and jQuery AJAX (1-second polling) showing live parking availability; open-sourced on GitHub.

Wawasan Bela Negara Quiz Platform (Academic Project)

github.com/ranggalabs/Wawasan_bela_negara

HTML5, CSS3, JavaScript, Supabase, Vercel — <https://wawasan-bela-negara.vercel.app/>

- Built a multiplayer citizenship quiz for SMAN Tanjungsari, Sumedang, with 6-digit Game PINs, countdown timers, and a real-time podium leaderboard on Supabase.
- Deployed on Vercel.

EDUCATION

Universitas Komputer Indonesia (UNIKOM), Bandung

Sep 2022 – Feb 2027 (Expected)

Bachelor of Computer Science — GPA 3.18/4.00

ORGANISATIONAL EXPERIENCE

Lab Assistant, AP2SC UNIKOM Hardware Laboratory

Jul 2024 – Nov 2024

- Mentored 100+ undergraduate students in practical computer hardware assembly and troubleshooting sessions.
- Assisted lecturers in delivering practical course materials and invigilated practical midterm exams (UTS), ensuring academic integrity.
- Maintained laboratory infrastructure and hardware equipment for smooth learning sessions.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML5/CSS3, Tailwind CSS, Ant Design, Vite, Responsive Web Design

State & Data: TanStack Query, Zustand, React Hook Form, Zod, RESTful API Integration, WebSockets

Backend & Database: PHP, MySQL, Supabase, Node.js, Express, PostgreSQL, NoSQL.

IoT: ESP32, HC-SR04 ultrasonic sensor, HTTP communication

Mapping: Leaflet.js (GIS/Maps)

Tools: Git/GitHub, Vs Code, Antigravity ide.

ADDITIONAL

Languages: Indonesian (native); English — EPT score 497 (UNIKOM Language Center, 2026)

Certifications:

- Web Developer Competency Certificate — LSP Informatika (BNSP), 2026
- CCNA — Cisco Networking Academy, [2024]
- English Proficiency Test (EPT), Score 497 — UNIKOM Language Center, 2026
